

1. What country did your group select?

Canada

2. What did you research today? What have you measured today?

We researched the Canadian coins and measured one wall

3. What do you still need to investigate during our next class?

How much space the coin takes up.

4. How is your group presenting your project to the class on day #3?

On a poster

1. What country did your group select?

Japan

2. What did you research today? What have you measured today?

Yen /  room

3. What do you still need to investigate during our next class?

Computer / measuring tape / ruler /

4. How is your group presenting your project to the class on day #3?

Poster

1. What country did your group select?

Japan

2. What did you research today? What have you measured today?

The hight of the wall  
The length of the floor  
what A Yen is

3. What do you still need to investigate during our next class?

The width of the floor

4. How is your group presenting your project to the class on day #3?

Resi

1. What country did your group select?

Great Britain

2. What did you research today? What have you measured today?

We researched the diameter of coins but  
we didnt measure yet

3. What do you still need to investigate during our next class?

yes we also still need to find out  
the cost of each pence/penny.

4. How is your group presenting your project to the class on day #3?

The Fancier Powerpoint  
Presentation

1. What country did your group select?

Great Britain

2. What did you research today? What have you measured today?

We researched the type of coins  
the dimensions and the conversions of great britain money to  
us money

3. What do you still need to investigate during our next class?

We didn't get to measurements today  
We need the measurements and  
area of the classroom

4. How is your group presenting your project to the class on day #3?

Powerpoint  
Presentation

1. What country did your group select?

Ethiopia

2. What did you research today? What have you measured today?

We researched ethiopian coins,  
and we measured the height of the  
wall.

3. What do you still need to investigate during our next class?

The diameter of the coins, and the  
area of the wall, and the floor.

4. How is your group presenting your project to the class on day #3?

Powerpoint

1. What country did your group select?

Canada

2. What did you research today? What have you measured today?

We researched the diameters of  
the coins. Nothing yet

3. What do you still need to investigate during our next class?

Next Math class we need to find  
out the measurements.

4. How is your group presenting your project to the class on day #3?

We are doing a Power Point.

- 
1. What country did your group select?

My group selected Great Britain

2. What did you research today? What have you measured today?

\*

3. What do you still need to investigate during our next class?

We still need to investigate the circumference  
the cost, The weight,

4. How is your group presenting your project to the class on day #3?

We will be doing it on a Presentation

1. What country did your group select?

ethiopia

2. What did you research today? What have you measured today?

we researched how much would the coin cost in america and we measured the floor

3. What do you still need to investigate during our next class?

We still need to investigate what's the length width and height of the class room

4. How is your group presenting your project to the class on day #3?

Powerpoint

1. What country did your group select?

Ethiopia

2. What did you research today? What have you measured today?

I researched we measured  
what can we the width  
choose of the class

3. What do you still need to investigate during our next class?

We need to finish measuring  
and find out the history of  
our coin.

4. How is your group presenting your project to the class on day #3?

Power Point
